The European Commission as...

...Policy Maker

Launches policy debates

Invites Member States to take action

Proposes EU legislation

...Funding Agency

e.g. Research & Innovation

Access policies for funded research

...Infrastructure Builder

Funds research infrastructures

Funds related research

Supports networking activities

27 Commissioners...

Digital Agenda

Neelie Kroes

R&I, ERA

Máire Geoghegan-Quinn

...proposed Horizon 2020

Key elements

- For 2014-2020
- For R&D and for Innovation projects
- Funding: EUR 80bn
- ...
- Strong increase for e-Infrastructures
- Open Access to research results: for all publications, to data where appropriate

...now debated in Parliament and Council

European Parliament

<http://europarl.europa.eu/>

Council of the European Union

<http://consilium.europa.eu/>

...in particular
on Open Access

What is open access (OA)?

OA = online access at no charge to the user
to scientific publications (long form: BOAI
and BOAI10 Recommendations just out)

OA comes after a decision to
publish, no mandatory publishing

Gold OA: possible payment by author
immediate OA in an OA journal

Green OA: self-archiving of manuscript
some publishers require embargo period
(delayed OA) in OA repository

Open Access Pilot in FP7

*"If I have seen further it is by standing
on the shoulders of giants."* Isaac Newton, 1676

Status Quo until 2013

OA to Publications

Covers 20% FP7 budget
Best effort mandate
Embargo (6/12m)
Costs reimbursable

OA to Data

Some projects
Not systematic

Strong political support

"Access to scientific results for free, for all, for ever **is a compelling vision** indeed."

"The question is no longer 'if' we should have open access. **The question is about 'how'** we should develop it further and promote it."

"Scientific information has the power to transform our lives for the better - **it is too valuable to be locked away.**"

Innovation Union & Open Access

“[...] the Commission will propose a European Research Area framework and [...] **open access to publications and data** from publicly funded research”.

“The Commission will promote open access to the results of publicly funded research. It will aim to **make open access to publications the general principle** for projects funded by the EU research Framework Programmes [...]”

Innovation Union (COM(2010)546, 06.10.2010),

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:52010DC0546:EN:NOT>

Communication & Recommendation on Scientific Information

Adopted on 17 July 2012: Documents at
<http://bit.ly/MuHbB1>

Goals

- ↪ 100% OA for publications in Horizon 2020
- ↪ Member States to have OA policies by 2014
- ↪ 60% of publicly funded research OA by 2014

OA in Horizon 2020

OA Pilot in FP7

"Best effort" OA
7 work programmes
Peer-reviewed publications
Allowed embargos: 6/12 months
(for social sciences
& humanities)

Green OA

OA mandate in H2020

OA Obligation
All work programmes
"
"

**Plus: Possibility for
research data**

OA publishing costs

Eligible while
project runs

Gold OA

OA publishing costs

Eligible while project
runs
New financial tool to
cover later publications

OA in the Member States

Conclusions of policy review

Disparate follow-up to 2007 EU initiative

No clear OA obligations in many MS

→ 2007 policy needs to be updated

Commission Recommendations

Complete set of recommendations to MS

Consistency between H2020/MS policies

OA to publications

OA to data (with some caveats)

Accompanying measures

"My goal is to **raise awareness** of the opportunities represented by scientific data"

<http://europa.eu/rapid/pressReleasesAction.do?reference=SPEECH/10/518>

"[T]ruly free access to scientific data is not possible without a **coordinated effort** of European and global stakeholders to build and sustain an underlying seamless and trusted infrastructure."

<http://europa.eu/rapid/pressReleasesAction.do?reference=SPEECH/10/716>

"[**Interoperability**] is the key to global, multi-disciplinary science, supported by reliable and high-performance data infrastructure. We need datasets and software to work with each other"

<http://europa.eu/rapid/pressReleasesAction.do?reference=SPEECH/12/392>

Riding the wave

How Europe can gain from the rising tide of scientific data

Final report of the High Level Expert Group on Scientific Data
A submission to the European Commission

October 2010

http://bit.ly/riding_the_wave

"the data themselves become the infrastructure".

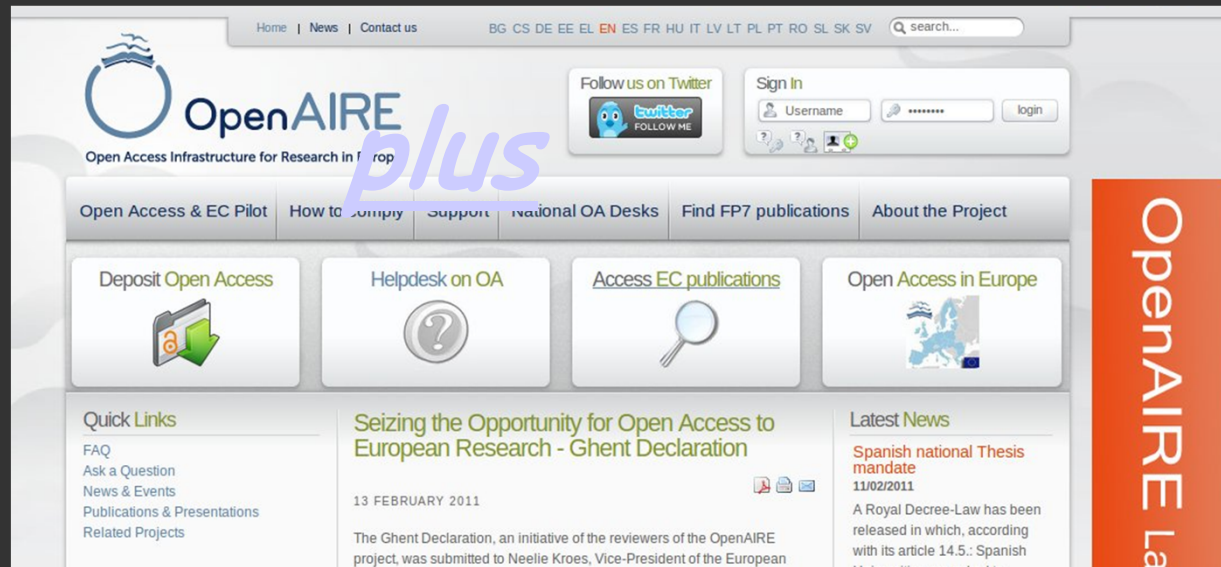

Knowledge without Borders

GÉANT 2020 as the
European Communications Commons

Geant High Level Expert Group,
Report of October 2011 <http://bit.ly/geantEG>

Preparing
for
Data

Building Infrastructures

<http://www.openaire.eu>

<http://europeana.eu>

<http://www.geant.net>

<http://www.prace-project.eu>

maintain, link, extend

What next for Open Science?

Policy

Who will run science data infrastructures?
Towards a common approach in Europe
International coordination

Funding

Build on PRACE, GÉANT, OpenAIREplus etc.
Infrastructures to cope with "Big Data"
Drive research into tools & methods (e.g. [EUDAT](#))

Community Building

For example: Digital Humanities
[Europeana](#) as a research infrastructure (funded through the [Connecting Europe Facility](#))

Discussion

How to bring together the Open Access and Open Data Communities? (On policy, on technology?)

Joint projects?

Institutional questions: Role of Libraries?

Common challenges? E.g. (publications/documents as data, micro publications, text mining, etc.)

What should Horizon 2020 fund?

Learning from each other: Formats, architecture, infrastructure

Is research data just a special case?

Pointers
