

COAR Interest Group

Usage Data and Beyond

Workshop “Usage Statistics and Beyond”

22-23 April 2013, Berlin

Eloy Rodrigues | eloy@sdum.uminho.pt

Daniel Beucke | beucke@sub.uni-goettingen.de

Objectives

The group deals with **interoperable usage statistics** e.g. combining usage data from multiple sources. There are **various initial projects** at national and international level for gathering and aggregating usage data from repositories.

This group aims at **collecting these (technical and organizational level) experiences** in order to **standardize** the transfer protocol and data format. In addition, the group keep in view the developments in **alternative impact measurement**.

Organization

- Sub group of Working Group 2 „Repository Interoperability“
(Chair: Eloy Rodrigues)
- Interest Group Leader: Daniel Beucke
- Participants
 - You?!
- A COAR membership is preferable but not a must have (right at the start)

Activities

Summer 2013 – Robot List

- A common used robot list to provide a global blacklist to exclude non human clicks from usage statistics.
- The group will commit to initiate such a list on a global level, to give it recognized authority and support its further development

Autumn 2013 – Deliverable: enhancement of the “State of the art report”

- A detailed overview of initiatives and projects which deal with usage data for an enhancement of the “State of the art report” from COAR Interoperability WP2.
- The deliverable includes an outlook to the alternative impact measurements initiatives.

Spring 2014 – Workshop/IG meeting for discuss the work done and further steps.

- next Annual Meeting?

Time unknown – Pilot project providing a new citation metrics example (global scope) for repositories

Discussion

Thank you for your attention. Questions?
